

ROADMAP

Who we are and where we are going

▷ Formed by a group of friends who grew tired of the rug pulls, honeypots and scams, Vice was created using full transparency and a real business model to achieve long term growth for its holders/investors.

▷ Ran by a team with over 10 years experience in business start-ups, technology development and sales/marketing, Vice is destined for success and high investment returns.

How? Revenue streams and token burn.

We are building multiple revenue streams. These profits will be injected into the liquidity pool and the equivalent tokens will be burned. This token burn will make the tokens of all holders more valuable.

As a result of these measures, the price will significantly increase over time.
